AC 1500
The ultimate generation of compact cage and bottle washer

- Automatic vertical sliding door made of double HST tempered glass.
- Separate washing and rinsing circuits
- Oscillating spray arms
- Up to 32 mice cages per load
- Two inclinable slide out trays for easy loading and unloading
Steelco AC1500 cabinet washer is the perfect solution for your small-medium facility needs or the ideal backup unit for your large vivarium.

The patent pending three levels oscillating spray arms assure extremely low cycle time and utility consumptions with unmatchable washing results.

**Key features**

- Automatic vertical sliding door made of double HST tempered glass.
- Steam or electric heating.
- Double door pass-through configuration available.
- Chamber and doors entirely made of stainless steel AISI 316L.
- External body made of stainless steel AISI 304.
- Oscillating spray arms positioned on the top, middle and bottom levels of the washing chamber.
- Two levels loading trays that slide on rollers for a convenient loading/unloading.
- An adjustable inclination system with three different possible angles for optimized load presentation.
- Independent rinsing circuit.
- Multi stage filtering system.
- Self-cleaning filter for the recirculation of washing water.
- Washing pump pressure switch.
- Sanitization by rinsing at 85°C/185°F.
- Tank and sump temperature check.
- Equipped with 1 chemical dosing pump as standard, controlled by a micro-processor which allows to set the optimal dosing level for each type of cycle.
- The presence of detergent in the drum is monitored and in case of low level, the control system warns with an alarm.
- Industrial PLC with Touch Screen HMI and USB port.
- RS 232 port for printer connection.
- Detergent cabinet with capacity of up to four 20 lt / 5,28 US gal containers.
- Tele-service ready.
- Tablet connectivity ready.
- Software utilities consumption E-meter.
- Self-start feature.

**Additional features**

- Double door pass through version
- Acquatic tank processing kit
- Integrated printer
- Chamber illumination
- Electrical drying system with blowers
- Drain pump
- Exhaust fan
- Additional dosage unit
- Remote dosage units (two dosage units are included)
- Steam condenser for non-vented application
- Steam condenser with heat recovery system for inlet water
- Water discharge cooling down system by injection of cold water in the drain line
- Flange for modular wall
- Knock down configuration
- SteelcoData View - cycle traceability software
